ZTWC4B – POTABLE WATER CART

4 × 5 GALLON

ZENITTEC AVIATION

General Description

The ZTWC4B 4×5 Gallon Potable Water Cart is a compact and mobile potable water servicing unit designed for aircraft that require smaller volume water refilling.

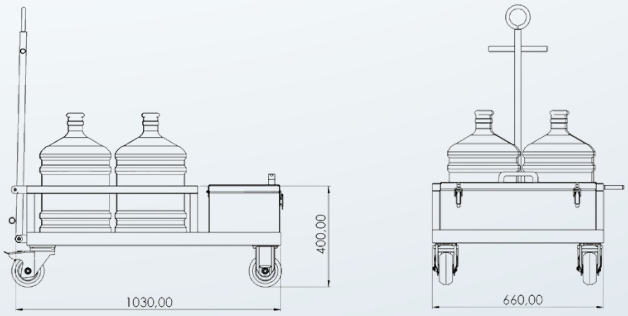
With four removable 5-gallon tanks and an integrated electric pump system, it provides flexible and hygienic water delivery for general aviation, regional aircraft, and hangar-based servicing operations.

Technical Specifications

Specification	Value
Tank Capacity	4 × 5 gallons (20 gallons total)
Pump Type	Electric pump
Hose	Food-grade water hose
Frame	Welded steel structure
Finish	Powder-coated
Application	Aircraft potable water servicing

Standard Equipment

- **Four 5-gallon potable water containers**
- **Electric pump system**
- **Food-grade delivery hose**
- **Fill caps and drain outlet**
- **Welded steel chassis**
- **Powder-coated corrosion-resistant finish**



Operational Advantages

- **Electric operation suitable for apron use**
- **Controlled flow rate for safe aircraft servicing**
- **Compact design for easy maneuverability**
- **Hygienic system designed for potable water applications**
- **Low maintenance structure**

Applications

- **Narrow-body aircraft**
- **Regional aircraft**
- **General aviation aircraft**
