ZTFD2G - FLUID DISPENSER

2 GALLON

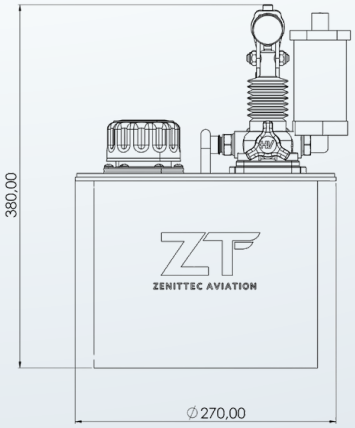
ZENITTEC AVIATION

General Description

The ZTFD2G is a heavy-duty, stainless steel fluid dispenser designed for the rugged demands of aviation line maintenance. Engineered to withstand harsh apron conditions, this unit provides a contaminant-free, closed-loop method for dispensing hydraulic fluids and engine oils. Its corrosion-resistant stainless steel construction ensures maximum fluid purity and long-term durability, making it the preferred choice for servicing high-performance aircraft systems.

Standard Equipment

- **2 Gallon (7.6 Liters) Stainless Steel Reservoir**
- **Integrated Fluid Level Sight Gauge**
- **5-Micron Absolute Filtration System**
- **High-Pressure Manual Hand Pump**
- **2-meter discharge hose with swivel coupling**



Applications

Hydraulic Reservoir Topping, Aircraft Engine Oil Servicing, IDG / CSD Oil Replenishment, APU Oil Maintenance, Severe-duty Ramp Operations

Technical Specifications

Tank Capacity	2 Gallons (7.6 Liters)
Tank Material	Polished Stainless Steel (Corrosion Resistant)
Pump Operation	Manual / Hand Operated
Filtration	5-Micron Absolute
Hose Length	2 Meters (7 ft)
Fluid Compatibility	Skydrol, HyJet, Engine Oil, Red Oil (Universal)
Seals	Viton
Dry Weight	6.5 kg (approx.)
Compliance	Meets SAE and OEM purity standards

Operational Advantages

- **Stainless steel tank withstands impact and harsh weather.**
- **Non-reactive material prevents fluid degradation.**
- **5-micron filtration ensures OEM-level cleanliness.**
- **Compatible with aggressive solvents like Skydrol.**
- **Stable base with a robust carrying handle.**
